

Core Indicator Set Quick Reference

Use this quick reference for operational tracking across monthly dashboards, team reviews, and rollout cycles.

Indicator Set

- **Validation pass rate:** Percent of consequential outputs that pass required checks on first review.
- **Correction load:** Reopened items per 100 AI-assisted outputs.
- **Approval clarity:** Percent of consequential outputs with named approver and evidence references.
- **Escalation timeliness:** Percent of flagged uncertainty cases escalated within one business day.

Interpretation Guidance

Interpret these indicators as a set. Improvement in one indicator can mask deterioration in another.
