

Weekly Manager Review Script

Use the same five prompts each week to keep oversight comparable across teams and cycles.

Weekly Prompts

1. Which output category had the highest first-pass failure rate this week?
2. Which failure mode repeated most often, and why?
3. Where did escalation happen too late for consequence tier?
4. Which owner needs support, reassignment, or clearer decision rights?
5. What scope decision is required now: expand, hold, or redesign?

Guidance

Keep the review short, evidence-based, and tied to one intervention decision per cycle.
